EXPERIENCE

E2E Networks, Associate Software Engineer | New Delhi

01/2025 - Present

- Architected and deployed microservice-based backend systems using Python, Django, Celery, and Ansible to power high-availability cloud solutions.
- Leveraged AI orchestration tools including Claude Code, Kilo Code, and Open Code to plan and develop features, reducing end-to-end development time by 10x through strategic prompt engineering and automated code generation.
- Implemented Multi-Master Kubernetes (K8s) architecture for K8s-as-a-Service, utilizing multi-node redundancy to ensure seamless uptime and robust disaster recovery.
- Engineered secure multi-cloud VPC peering for data platforms, enabling encrypted, low-latency communication for high-performance data-streaming applications.
- Developed automated snapshot shipping to S3-compatible object storage using Linstor, enabling restoration of stateful applications and dashboards after critical failures.
- Designed a multi-region read-replica architecture to enable cross-region failover and disaster recovery, ensuring uninterrupted uptime for analytics workloads.
- Enhanced high-throughput DBaaS APIs, reducing response latency by 35% through query pipeline optimization and efficient caching serialization.
- Optimized HAProxy load balancing for real-time workloads, increasing request throughput by 40% and decreasing latency by 25%.
- Resolved 20+ critical production issues across distributed storage and compute layers, improving overall platform uptime by 30%.

Quickdesk Academy, Software Developer Intern | Remote (Singapore)

05/2024 - 11/2024

- Delivered full-stack modules using Nest.js, React, TypeORM, and Docker, improving campaign performance by 40% and cutting deployment cycles by 50%.
- Developed conversational-AI flows using Rasa intent models and OpenAI GPTs for Engages.ai, reducing lead response time by 30%.
- Integrated analytics pipelines for behavior-based tracking and lead attribution, increasing client acquisition by 10% within six months.
- Built automated engagement dashboards to visualize customer lifecycle metrics and power data-driven lead qualification decisions.

OneInfinity Labs, Software Engineer Intern | Remote (India)

01/2024 - 05/2024

- Developed LLM-powered content automation pipelines using LangChain to automate personalized coding and MCQ generation, reducing manual effort by 50%.
- Architected a scalable datastore using Supabase, improving data retrieval speeds by 30% for dynamic content recommendations.
- Integrated AI content delivery pipelines into internal dashboards to enable personalized delivery at scale.

SKILLS

Languages	Python, JavaScript, Java, SQL, C/C++, Bash, Git.
Backend and Frameworks	Django, Flask, FastAPI, Nest.js, Node.js, Express.js, Celery, Microservices, RESTful APIs, System Design.
Frontend	React.js, Next.js
Cloud and Infrastructure	AWS, Docker, Kubernetes, Ansible, HAProxy, VPC, VPC Peering, Linstor.
Databases	MariaDB, MySQL, PostgreSQL, Supabase, Redis, MinIO (Object Storage).
AI Tools	LangChain, OpenAI GPT, Hugging Face Transformers, Rasa, PyTorch, TensorFlow, Claude Code, Kilo Code, OpenCode
Tools	Linux, Bitbucket, GitHub, Postman, Vim.

PROJECTS

Intent Classification | AmazonScience MASSIVE dataset | Github: Link

10/2023

- Built a multi-class (60) multilingual (52 languages) LLM-based classifier using Transformers, HuggingFace, TensorFlow & PyTorch.
- Achieved 85% accuracy and F1 score of 80.05%, optimized via hyperparameter tuning and data pre-processing pipelines.
- Packaged deployment using Docker for reproducibility.

Interpreter | Lox Programming Language | Github: Link

06/2023

- Implemented an interpreter supporting dynamic typing, control flow, OOP features, garbage collection, and error handling using Java & Parsing Theory.
- Tools & Technologies: Java, Parsing, Scanning, OOPs.

EDUCATION

The LNM Institute of Information Technology, Jaipur, Bachelor of Technology in Computer Science and Engineering | CGPA - 7.77

05/2025

St. Dominic's Sr. Sec. School, XII | 96.3%

08/2020

POSITION OF RESPONSIBILITY	
Member and Host <i>CMLBDA Podcast</i>	12/2024
President (Jaipur Team) <i>BloodConnect Foundataion</i>	12/2023
